Professional Summary

Software Engineer with 4+ years of experience building full-stack applications, AI-driven platforms, and production software systems. Experienced in React, Next.js, TypeScript, Node.js, Python, Java, PostgreSQL, REST APIs, and AI/ML technologies. Strong hands-on experience in AI prompting, AI-assisted software development, code generation, custom AI agent building, MCP tools, vector search, Retrieval-Augmented Generation (RAG), generative AI, GPU-accelerated inference, and AI tool adoption using ChatGPT, Claude, Gemini, and Cursor.

Technical Skills

Programming Languages	: TypeScript, JavaScript, Python, Java, Dart, SQL
Frontend	: React, Next.js, Flutter, Vite, HTML5, CSS3, Tailwind CSS, Material UI
Backend	: Node.js, Express.js, FastAPI, Spring Boot, REST APIs
AI / Machine Learning	: Artificial Intelligence, Machine Learning, NLP, OpenCLIP, PyTorch, CUDA, Generative AI, FLUX.2, Retrieval-Augmented Generation (RAG)
AI Tools	: ChatGPT, Claude, Gemini, Cursor, OpenAI, Anthropic, Google Gemini
AI Engineering	: AI Prompting, AI-Assisted Development, MCP Tools, Custom AI Agent Building, Code Generation, AI Workflow Automation
Vector Search & Retrieval	: Vector Search, Embeddings, Semantic Search, Retrieval-Augmented Generation (RAG), Qdrant
Databases	: PostgreSQL, SQLite, Qdrant
Cloud / DevOps	: Docker, Docker Compose, Nginx, AWS, Git, GitHub, CI/CD

Professional Experience

D3E Studio Private Limited

Software Engineer

Hyderabad, Telangana

September 2025 – Present

- Develop AI-powered software-generation capabilities that transform natural-language prompts into complete software applications.
- Implement AI-assisted code-generation workflows and prompt-engineering techniques that reduced development time by 80%.
- Contribute to scalable application architecture, multi-tenant deployment workflows, automated testing, and production integrations.
- Develop and maintain React/TypeScript and Dart/Flutter code-generation capabilities within the D3E Studio model-driven development platform.
- Apply AI tools, prompting techniques, MCP-based workflows, and AI-assisted development practices to improve software engineering productivity.
- Collaborate with cross-functional teams to integrate AI capabilities into production-grade software systems.

NITYA Software Solutions Inc

Software Engineer

Hyderabad, Telangana

August 2022 – September 2025

- Developed and maintained 5+ client-facing applications using Flutter and React.js across the full software development lifecycle.
- Improved delivery efficiency by 40% through structured development workflows and automation.
- Designed RESTful APIs and integrated third-party services to extend application functionality.
- Optimized application and database performance, reducing application load times by 35%.
- Collaborated with cross-functional teams of 5–10 members to deliver production software and resolve technical issues.
- Mentored junior developers through code reviews, technical guidance, and software engineering best practices.

Projects

D3E Studio

React, TypeScript, Dart, Flutter, Java, Gradle, Visual Studio Code Tooling

- Contributed to the implementation of the D3E Studio low-code development platform.
- Worked on React and Dart code-generation support for D3E models, components, pages, and application logic.
- Developed and maintained D3E Studio components, UI definitions, templates, and generated application structures.
- Supported integration between the D3E language, Studio tooling, generated frontend code, and backend services.

- Contributed to Studio implementation and improved React and Dart/Flutter code-generation capabilities for D3E applications.

D3E AI Website Builder

React, Next.js, TypeScript, PostgreSQL, OpenAI, Anthropic, Gemini

- Developed an AI-assisted website generation platform that converts natural-language business requirements into multi-page websites.
- Built a registry-driven architecture supporting reusable components, themes, industry templates, design tokens, and automated TypeScript code generation.
- Implemented PostgreSQL-backed authentication, project storage, usage tracking, Stripe billing, OAuth, website previews, and deployment workflows.

Restaurant Management System & AI Virtual Human

React, TypeScript, Node.js, Express, PostgreSQL,

SQLite, MCP, PyTorch, CUDA

- Developed a full-stack restaurant platform covering orders, menus, reservations, inventory, employees, reporting, payments, and audit logging.
- Implemented offline-first restaurant operations using SQLite edge deployments with synchronization to cloud PostgreSQL.
- Built an AI restaurant reception kiosk with MCP, voice interaction, and a GPU-accelerated virtual human using MuseTalk, SadTalker, Wav2Lip, Edge TTS, FFmpeg, PyTorch, and CUDA.

Semantic Image Search Platform

React, TypeScript, FastAPI, OpenCLIP, PyTorch, Qdrant

- Built a semantic image search platform using CLIP embeddings and cosine-similarity ranking for natural-language image retrieval.
- Implemented image ingestion, 512-dimensional embeddings, Qdrant vector indexing, metadata filtering, asynchronous processing, batching, caching, and request deduplication.

FLUX.2 AI Image Generation Lab

Python, PyTorch, CUDA, Diffusers, FLUX.2, Gradio

- Built a prompt-to-image generation application with multi-reference image editing supporting up to 10 reference images.
- Optimized GPU inference using 4-bit NF4 quantization, CPU offloading, and Diffusers group offloading; deployed inference on a rented Vast.ai GPU.

FreshMart Inventory Management System

React, TypeScript, Java, Spring Boot, PostgreSQL, Docker

- Developed a multi-tenant inventory platform supporting product catalogs, warehouses, procurement, stock movements, sales, returns, batch/expiry tracking, alerts, and operational reporting.
- Implemented REST APIs, JWT/OTP authentication, role-based authorization, audit logging, WebSocket notifications, Flyway migrations, and Docker deployment.

RewaHR – HR Management Portal

Java, Flutter, React

- Developed a full-featured HR management portal designed to streamline attendance, payroll, leave management, and employee tracking.
- Implemented secure role-based access to support different HR and organizational user responsibilities.
- Developed real-time reporting dashboards to provide HR teams with operational visibility and workforce information.

Education

Sri Chaitanya Technical Campus

Bachelor of Technology in Computer Science

Hyderabad, Telangana

October 2022 – July 2025

- Admitted after Diploma in ECE – 3-year program (Lateral Entry via TS ECET).
- Pursued B.Tech via Lateral Entry while working full-time as a Software Engineer – a recognized AICTE-approved pathway for Diploma holders entering directly into 2nd year.

Government Model Residential Polytechnic, Gajwel

Diploma in Electronics and Communications Engineering

Gajwel, Telangana

June 2019 – May 2022

Achievements

- Received a Certificate of Appreciation from the President and CEO of D3E Studio for exceptional contributions and technical excellence.
- Contributed to an AI-driven application-generation platform enabling non-technical users to create functional software.
- Conducted AI Tools Awareness Classes covering practical adoption and utilization of AI development tools such as ChatGPT, Claude, Gemini, and Cursor.
